RCF-FOLD TOP

Secure fencing where safety is a paramount

Description

RCF Fold Top is a multipurpose fencing system used for aesthetically pleasing perimeters and boundary demarcation.

Fold top wire mesh fencing is an increasingly favored option for educational institutions, recreational areas, and play spaces, providing a safe and secure perimeter without any sharp edges

Manufactured from 5mm diameter wire, and complete with a Rolled Profile at the Top and bottom of the pane. This wire mesh fencing panel system is fixed to RHS posts using metal fixing brackets, via VM's anti tamper security fixings. Additional fixing points on the posts allow for the stepping of panels on undulating sites.

A variety of standard widths are available for single and double leaf swinging and sliding gates to meet your specific needs.

Benefits:

- Designed for children
- Secure
- Simple to assemble
- Wide range of accessories available
- Variety of heights and lengths

Applications:

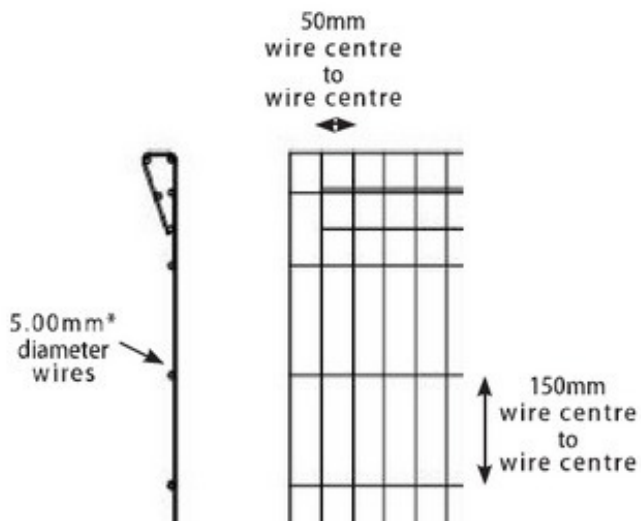

- Playgrounds
- Leisure grounds
- Schools
- Nurseries
- Public places

Details

Specification:

Manufactured from Galvanised wire to BS EN 10244-2 Class D (minimum 40g/m²) Panels are Pre-treated and provided with a conversion layer for a better anti-corrosive effect and better adhesion of the polyester powder coating.

5mm Horizontal Wires
5mm Vertical Wires
Width = 3.004m Heights
- see table Mesh
Aperture of 50 x 150mm
